## Specifications

### General characteristics

|                                   |                                                                        |
|-----------------------------------|------------------------------------------------------------------------|
| Accessory type                    | Heat shrink                                                            |
| Operation lower temperature       | -40 °C                                                                 |
| Operation upper temperature       | 125 °C                                                                 |
| Colour                            | Black                                                                  |
| Inner diameter after heat-shrink  | 4 mm                                                                   |
| Length                            | 30 mm                                                                  |
| Wall thickness after shrinking    | 1.8 mm                                                                 |
| Inner diameter before heat-shrink | 16 mm                                                                  |
| Extra information                 | Halogen free, With inner glue                                          |
| Remark                            | For CYFA/CYMA 16 contacts or for conductor with total external Ø 10 mm |

### Material

|          |                   |
|----------|-------------------|
| Material | Polyolefin (PO-X) |
|----------|-------------------|
