

# ■ Main Features

- High efficiency and compact size
- Overload 150%
- Constant current or hiccup mode limitation, user settable
- Easy parallelable for power increase
- Low noise thermally regulated "long life" fan
- Up to 60°C operating temperature with no derating

- 1) Ripple and Noise are measured with 20MHz bandwidth, probe terminated with a 0.1µF MKP parallel capacitor.
  2) Pay attention, set the current limitation mode jumper on C.C. mode when connecting more units in parallel.
  3) In case of 2 phases operation, reduce the output load to 50% of the nominal value.
  4) Start-up type tested: -40°C, possible at nominal voltage with load deration.

- Technical parameters are typical, measured in laboratory environment at 25°C and 400Vac / 50Hz, at nominal values, after minimum 5 minutes of operation.

   Power rating, losses, efficiency, ripple, thermal behaviour and start-up may change outside of the nominal rated input range. Contact factory for details.

   Data may change without prior notice in order to improve the product.
